A lot of thought goes into picking the right backpack to tote along to work. It must be comfortable, spacious (without being massive), structured and – most importantly – stylish enough for your co-workers not to confuse you with a teen extra on Riverdale.

Tastes can range, but a good business-friendly backpack should keep you organized while you're on the move and ensure that your laptop and other digital devices are secure. The last thing you need is for your computer to be flailing around as you dash to catch a train or for your cellphone to get lost in a bottomless abyss.

With thousands of backpack options on the market, it can be hard to choose just the right one. Don't worry, we've got you covered. Here's our list of five of the best business-friendly backpacks that you'd be proud to wear.
